Art Unit: 1617

Applicant's election with traverse of a method of modifying the appearance of a substrate, fillers, and salicylic acid derivatives in the reply filed on 8/24/04 is acknowledged. The traversal is on the ground(s) that no serious burden has been shown. This is not found persuasive because no burden need be shown. Applicants can simply overcome the requirement by stating on the record that the species are equivalent. However, then, a rejection over one species shall apply to all.

The requirement is still deemed proper and is therefore made FINAL.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-17, 22, 24, 29-30, 36 are rejected under 35 U.S.C. 102(b) as being anticipated by Stewart.

Stewart teaches application of a composition applied to the skin and lips (abstract). An enhanced appearance is disclosed (column 3 line 31). 2-4% tricontanyl PVP is specified (column 8 lines 7-8). Example 1 is an oil-in water emulsion. Octyl ^a slicylate is specified (column 4 line 32). A filler is disclosed (column 6 line). As to the [^] claimed molecular weight, Stewart uses the same polymer of commerce (WP-660 ^{disclose (page 12 paragraph} column 6 line 38) that applicants 46). The claimed cooling effect must be possessed by [^] the anticipatory composition because it is the same as that claimed.
